DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 23-37, drawn to a transgenic wheat plant cells, plants and seeds expressing a maltogenic alpha-amylase.

Group II, claim(s) 38-42, drawn to a method of preparing a baked product.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: because the inventions of Groups I and II do not constitute an advance over the prior art. The claimed inventions of Groups I and II are described in WO 91/14772 by Pen J. *et al.* on page 7, lines 1-10 and 27-31; page 8, lines 1-33; and page 9, lines 17-26. The reference reads upon claims 23, 24, 28, 30-32, 34-35, 37-40, and 42 that are broadly drawn to a cereal plant or a wheat plant transformed with a nucleotide sequence encoding a maltogenic amylase, seeds thereof, and a method of making baked products from the flour of cereal seed comprising the nucleotide encoding the maltogenic alpha-amylase. Thus, there is no special technical feature linking the transgenic wheat cells, plants, and seeds of Group I to the method of preparing a baked product of Group II.

Art Unit: 1638

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are the transgenic wheat plant cells, plants, and seeds expressing a maltogenic alpha-amylase of Group I and the method of preparing a baked product of Group II that results in different effects and utilizes different starting materials than the plants of Group I.

Because the inventions are distinct for the reasons given above and have required a separate status in the art as shown by their different classifications, recognized divergent subject matter, and because the search required for one of the groups is not required for another restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Russell Kallis whose telephone number is (703) 305-5417. The examiner can normally be reached on Monday-Friday 8:30-5:00.
